Summary

Engineering Manager with a software development career spanning nearly 20 years in the JVM ecosystem.

I combine people leadership with hands-on experience in developer infrastructure, production services and reliable delivery.

Experience

Engineering Manager

2022-Now *DKB Code Factory*

- Lead a 10-person cross-functional team (5 direct reports) delivering document and communication services
- Owned large document and data migrations and the transition to AWS, aligning stakeholders through delivery
- Created AI skills that implement vulnerability fixes for engineer review, supporting service modernization and DevOps
- Previously formed and led a 10-person cross-functional team, hiring 3 in-house backend developers and 2 external frontend developers. Delivered Kotlin / Spring Boot services on Kubernetes for banking-product discovery
- Established Scrum across both teams, making delivery, maintenance and technical improvements visible in planning
- Hired approximately 7 engineers teams and supported progression to mid-level and senior roles
- Created and improved hiring, development and feedback tools and guidance adopted by other managers and backend teams

Full-stack Developer

2021-2022 *Creator of moviemirador.com*

- Independently built a product spanning Kotlin REST and SPARQL crawlers, Python and Jupyter analysis, and a cross-platform Flutter app

Senior Software Engineer

2017-2020 *AUTO1 Group*

- In the Java-Ops core team, dockerized services across the company and standardized Jenkins pipelines, service configurations and production operations
- Helped development teams deploy and operate their services independently, while enabling DevOps to support a consistent setup
- Built shared libraries for Java services, including custom service discovery, and supported production services using Elasticsearch

Technical Leader

2017 *bonial.com*

- Provided technical coaching and shared delivery responsibility in a cross-functional web team, collaborating on testing and automation for reliable releases across countries

Senior Developer

2015-2016 *bonial.com*

- As the sole backend developer on a shopping-list app, built services, coordinated with Android and iOS engineers and developed an Android MVP
- Developed Java services and maintained a Groovy API supporting mobile applications

2012-2014 *Protec Mobile*

- Developed a Java application for analyzing mobile-user data

2012 *Startup*

- Created an application using Ruby on Rails

Junior Developer

2009-2010 *Alten*

- Developed Coslada town hall's Java web portal using Spring MVC and Hibernate

2008 *Alten*

- Developed a Java application for managing a SQL Server database

2007-2008 *Tecnocom*

- Maintained and extended the BBVA Java platform
